OBJECTIVES

Seeking a challenging, growth oriented position in a progressive, innovative and reputable organization to expand my learnings and knowledge and skills.

Secure a responsible career opportunity to fully utilize my training and skills, while making significant contribution to the development of the organization and myself.

WORK EXPERIENCE

- April2023-Oct2023
Soften Technologies
Software Developer
Good Experience as a Python full stack developer.
Django frameworks used in developing web applications

PERSONAL PROJECTS

- CAR RENTAL SYSTEM : The Online Car Rental System is a Django-based web application designed to streamline the process of renting vehicles for customers.
This platform provides an efficient and user-friendly way to search for available cars, make reservations, and manage bookings.
It also offers administrative tools for managing vehicle listings and user accounts.
- FLOOD PREDICTION USING MACHINE LEARNING : Developed a website for predicting the occurrence of flood using rainfall data and machine learning technique.
The application predicts the chance of occurrence of flood based on the rainfall of past ten days in a particular area.
- FIBRAS : This is a Navigation and Online Shopping project
The main purpose of this system is to give a mobile based solution, mainly for handling shopping in a manageable way to reduce the wastage of time, dissatisfaction and to gain efficiency and also to get the maximum satisfaction from the user.
