## PERSONAL PROJECTS

### Banking System using Python Django

- This Banking Management System Project is accessible to all registered bank account holders. The account holders can register their account by filling in all the required fields on the registration form page. This application requires the newly registered users to deposit money as the starting balance of their online account.
- Here, users can deposit a new amount to their account and withdraw from their current balance. The system also lists all the transaction records of the users that were done using the application. On the transaction records page, users can filter the records to show between two dates. Technologies used: Python, HTML5, CSS, SQLite, Tailwind CSS Framework, Python Modules/Libraries.
- Framework used: Django.

## SKILLS

python

Django

HTML

CSS

Javascript
