## PROJECT

### STUDENT MANAGEMENT SYSTEM

Student Management System can be used by education institutes to maintain the records of students easily. Achieving this objective is difficult using a manual system as the information is scattered, can be redundant and collecting relevant information may be very time consuming. All these problems are solved using this project. This project shows some ease in adding, editing and deleting the student details. It also provides a less time-consuming process for viewing, adding, editing and deleting the marks of the students.
