📁 PROJECTS

BLOOD BANK MANAGEMENT SYSTEM

A blood donation project is an initiative aimed at promoting the importance of blood donation and encouraging people to donate blood. Overall, a blood donation project aims to create a sustainable system for collecting and storing blood donations to meet the needs of patients who require blood transfusions.

Technology used:

HTML, CSS, JAVASCRIPT, JQUERY, ANGULAR, EXPRESS JS, MONGODB, REST API

🌟 ACADEMIC PROJECTS

Complaint Cell (Main Project)

An "all in one" complaint system is a centralized system

designed to receive and manage complaints from various sources. This system is

used by businesses, organizations, and government agencies to streamline their

complaint management process and improve customer satisfaction.

Technologies: Android, Python, sql

Online Kudumbasree Unit Management System (mini project)

The Online Kudumbasree Management System helps to automate and streamline the various activities of the Kudumbasree program, enabling better tracking, monitoring, and reporting of the program's outcomes. It also helps to improve the transparency and accountability of the program, making it more effective in achieving its objectives of poverty eradication and women empowerment

Technology used : php, sql
