In-Plant Training

- KELTRON CONTROLS - AROOR

Python Django project

CLEAN WELL

Completed a project on the topic "Clean well" is a house keeping application with django as back-end and , html, css, javascript, bootstrap angular js as front-end. Through this application we can book an employee as a home maid and can rent an equipment for all our cleaning purpose and can also book a date for our garbage disposal. For all the above services we can pay the amount needed for the service and can write review to the services. Here razorpay is used as the payment gateway for payment integration.

Project

SMART INTELLIGENT SECURITY SYSTEM FOR WOMEN

The Project describes about a smart intelligent security system for women. We are using two objects wrist band and spectacle. Screaming alarm and tear gas mechanism are imposed for self-defending purpose and send location and messages to the emergency contacts and also figure out the attacker using live streaming video.

Declaration

I declare that the above information is correct to the best of my knowledge and belief. I understand that action can be taken against me if these are found to be incorrect/false.
