Experience

2023 may- 2023 oct

Instadesign

python-django
developer

- Designed and developed web applications using Python and the Django framework, ensuring robustness, scalability, and high performance.
- Collaborated with a team of developers, designers, and project managers to gather requirements and translate them into technical specifications.
- Integrated RESTful APIs to enable seamless data exchange with external services.

2022 apr- 2023 apr

Luminar Technolab

python intern

I completed industrial Python training. The institution offers project-based IT training in Python as well as hands-on experience with current industry trends. Django framework has been used to create web applications. I have completed two projects from the institution. The National Council for Technology and Training (NACTET) issued the certificate with an A+ grade.

Projects

HELDER-FASHION STORE

This project is a fashion store website Using Django frame work . User can login, view product and purchase product through the payment integration like cash on delivery and Stripe. All the activities are monitored and controlled by an admin. This project indicates the whole system managing through this web app.
