📁 PROJECTS

Facial Recognition with Auto attendance Marker [🔗](#)

- Implemented facial recognition technology to improve attendance tracking, which can result in a 90% decrease in tardiness and absenteeism
- Utilized machine learning algorithms to train the system and improve the recognition rate by 95%
- Implemented a feature of auto-attendance marking, saving an average of 30 minutes per day for teachers
- Utilized my skills in Python, OpenCV and dlib to develop the facial recognition system, which can be used in different environments like classrooms, offices and events.
- Integrated the system with various other softwares like Excel. to make data transfer more efficient and user-friendly.
- Utilized my expertise in Python and the face_recognition module to develop a robust and efficient facial recognition system

Full Stack Weather Application [🔗](#)

- Built a full-stack weather application utilizing Django, Python, HTML, CSS, and Bootstrap, resulting in a user-friendly interface for searching and displaying weather data
- Utilized the OpenWeatherMap API to retrieve real-time weather data, improving the accuracy and timeliness of weather information for users
- Implemented views and templates to handle requests and display weather data, resulting in an intuitive and easy-to-use interface
- Incorporated RESTful API endpoints to handle CRUD operations, allowing for seamless integration with other weather services and applications

Habit Tracker - REST API [🔗](#)

- Implemented a REST API using Django, Python's popular web framework to track habits and monitor progress over time
- Utilized the Object-Relational Mapping (ORM) capabilities of Django to interact with a PostgreSQL database to store and retrieve user data, allowing for real-time updates and tracking
- Developed API endpoints and views to handle CRUD operations and requests and responses using serialization and deserialization
- Incorporated Django Rest Framework for better API development with security in mind and implemented error handling and logging to facilitate debugging and improve user experience.

Financial Application

- Built a financial management application using Django and Django REST framework, resulting in a user-friendly platform for managing and analyzing financial data
- Increased data accuracy by integrating the Plaid API and retrieving financial information from various institutions
- Implemented RESTful API endpoints to handle CRUD operations on financial data, resulting in a more efficient system
- Developed and implemented budget tracking and goal setting feature, which helped users to improve their financial planning
- Improved user experience by creating separate API endpoints for registration, login, and logout
- Ensured data security by implementing data encryption, secure storage and token-based authentication

Personal Portfolio Website

- Developed a personal portfolio website using HTML, CSS, Bootstrap, Sass, and JavaScript to showcase my skills, projects and work experience.
- Utilized Bootstrap framework to create a responsive, mobile-friendly layout, ensuring optimal viewing experience across all devices.
- Implemented Sass preprocessor to improve the maintainability, readability, and organization of the CSS code.
- Incorporated JavaScript to add dynamic elements such as smooth scrolling and active states on navigation links.
- Designed and developed a visually appealing layout to effectively communicate my brand and showcase my skills and projects.
- Utilized version control using Git to keep track of the changes and collaborate with team members if any.

PROFESSIONAL EXPERIENCE

Sutherland Global Service pvt ltd

Amazon Vendor Central Associate

Mar 2022 – present

Kochi, India

- Utilized in-house Amazon tools to perform catalog updates, resulting in improved product visibility and increased sales for vendors
- Developed a deep understanding of Amazon's e-commerce platform and gained experience in data analysis, troubleshooting, and problem-solving
- Assisted vendors with technical issues and provided solutions in a timely manner, resulting in improved vendor satisfaction
- Consistently met or exceeded performance targets, demonstrating a strong work ethic and ability to deliver results

Amazon Seller Support Associate

Apr 2021 – Mar 2022

kochi, India

- Provided technical support to Amazon sellers, resolving queries and providing solutions in a timely manner, resulting in improved customer satisfaction
- Utilized resources such as help pages to assist sellers with technical issues, demonstrating ability to navigate and utilize complex systems.
- Strong written and verbal communication skills, gained from experience in customer service and resolving queries.
- Proven ability to work independently and as part of a team, having worked in both solo and group
