## PROJECTS

---

- **Portfolio website**  
It's a website mainly build using JavaScript, html5,css its basically website to show case skills and achievements ( almost 2 portfolio website has been build and deployed to the cleints )
- **Auto attendance using facial recognition (software)**  
AI based software application which records attendance automatically In this method the camera is fixed in the classroom or office and it will capture the image, the faces are detected and then it is recognized with the database (matches the saved faces algorithm)and finally the attendance is marked automatically.
- **Dynamic website**  
Its is wesbite for a service center where people can sees about services provided by the company and their products. With better responsive web design. Its also for a photography equipment service center in thrissur.
- **Demo e-webstore**  
It's basically a web application just like filpkart and Amazon. Where customers can choose and by products for photography fields with reliable and effective design and with grrat responsive way and also had a cart option and like options and so on
