ACADEMIC PROJECT

Centralised Medical System

- A web-based application that enables efficient online interaction among doctors, patients, lab technicians, pharmacists, and hospitals.
- The application allows patients to book appointments and receive notifications for their next consultations and medical reports.
- Electronic health records, which contain the medical history and other important information of patients, are recorded in the application and can be accessed by healthcare providers later.
- The system ensures cost-effective means of increasing reliability, privacy, and security in the management of healthcare records, leading to improved accuracy, efficiency, and quality of healthcare data, and reduced medical errors.
