Completed X with a percentage of 80%

## PERSONAL PROJECTS

### BOOK STORE MANAGEMENT

- Designed and implemented the frontend using HTML, CSS, and JavaScript, providing an intuitive user interface for customers to browse and purchase books.
- Implemented robust search features allowing users to find books by title, author, and category, enhancing user experience and engagement.
- Ensured data security and efficiency by utilizing SQLite for the database, optimizing database queries for faster response times.
- **Technologies Used : HTML, CSS, JavaScript, Python Django, SQLite**
- <https://github.com/dipin736/Book-Store-Management-Django.git>

### Blog Website with React and Django

- Implemented user authentication and authorization using Django's authentication system.
- Created a custom API for handling blog post data, including image uploads and comments.
- **Technologies Used:React.js, Bootstrap, Django REST framework, MySQL**
- <https://github.com/dipin736/Blog-React-Django.git>

### Quiz Application with Django and React

- Developed a full-stack quiz application using Django for the backend and React for the frontend.
- Implemented user registration, authentication, quiz questions, and email notifications.
- **Technologies Used:React.js, Bootstrap, Django REST framework, Git**
- <https://github.com/dipin736/Online-Quiz-App.git>
