2015

SSLC

70%

## Skills

- Python
- Django framework
- Javascript Framework
- React
- Bootstrap
- HTML /CSS
- Sql and SQLite server

## Projects

### • Handwritten Recognition using ANN and CNN using Python Flask.

Handwritten recognition is the process of converting images of handwritten digit and characters into digital format. The Aim of this project is to implement a classification algorithm to recognize the handwritten digit and characters. CNN is playing an important role in many sectors like image processing.

### • Clinic Management system using Python Django

The project that mainly focuses on managing the details of patients, stock of medicines and the staff details associated with a clinic. It helps to reduce the effort of staffs to keep all the records of patients and their medicines. By using this system, we can keep the details of all other users such as doctors, pharmacist, receptionists.
