## PROJECTS

### camerinfoiks placement cell

📅 08/2022 - 11/2022    📍 kochi,kerala

We have introduced an application where the college placement cell admin can register and log in. The admin has the authority to provide usernames and passwords to each student. Students, in turn, have the provision to add their resumes and other academic details. The CF management team will filter the resumes and conduct online aptitude tests for 200 associate companies through this platform. Additionally, the application provides online mock interviews.

- front end:python
- framework:django
- backend:mysql

### ecommerce website for shopping

📅 06/2023 - 09/2023    📍 adoor

E-commerce is the process of conducting business through a computer network. Online shopping represents a form of electronic retail where buyers interact directly with the seller's computer, typically over the internet. Our objective is to create a website that automates operations in a surgical store and efficiently manages data in a systematic manner. This system facilitates order placement from various shops and offers essential items through the website. It allows customers to purchase various items online, incorporating features such as ratings and sentiment analysis to enhance the user experience.

- frontend:php
- backend :mysql

### Project Name

📅 09/2022 - 02/2023    📍 kochi

backend developer

- work at the backend developer taking task

## CERTIFICATES

### Web Development with MERN Stack.

Android Programming  
ASP.NET WITH C#

## SUMMARY

To work in a reputed company that offer professional growth and ample opportunities to learn and enrich my technical and innovative skills, so that I can make heal the contribution to my company and society.Stay updated with the latest technologies, tools, and best practices in software development.Write efficient, scalable, and maintainable code to optimize the performance of software applications.

## EDUCATION

### Master Of Computer Application

Mahatma Gandhi University

📅 09/2019 - 12/2022

## EXPERIENCE

### Software Developer

Muziris Softech

📅 09/2022 - 02/2023    📍 Location

ERP

- Collaborate with stakeholders to gather and understand software requirements.
- Analyze and document user needs to inform the software development process.
- Make decisions regarding the choice of technologies and frameworks for development.
- Write, test, and debug code to create functional and efficient software solutions.
- Implement features and functionality according to design specifications.
- Develop and execute testing plans, including unit testing and integration testing.
- Identify and fix bugs and issues in the code.
- Create and maintain technical documentation for code, APIs, and development processes.
