# **Objectives**

To work in an environment which encourages me to succeed and grow professionally where I can utilize my skills and knowledge appropriately.

#### **Education**

#### Class X

- Infant Jesus ISC School Mavelikkara
- Percentage: 76
- Passout year: 2016

#### Class XII - Computer Science & Information Technology

- Govt. VHSS Mavelikkara
- Percentage: 91
- Passout year: 2018

## **Bachelor of Technology - Computer Science Engineering**

- College of Engineering Chengannur
- CGPA: 6.5
- Passout year: 2022

#### Skills

- Communication and presentation skills
- Problem Solving
- Time Management
- Adaptability
- ▶ Team Player
- Programming skills such as SQL Server, C, C++, HTML, CSS, Python

# **Courses and Bootcamp**

- Coursera Introduction to HTML5
- ▶ ShapeAI Python and Cybersecurity

## **Project**

▶ Teacher Parent Interaction Interface

This project is aimed at developing a mobile campus application based on Android technology for the advancement of universities and the educational system. Teachers can use the application to interact with parents, and parents can access their children's academic information through it. By using Android, this process becomes easier, more secure, and less error-prone. It provides a variety of encryption algorithms to protect sensitive data. Through the use of voice assistants, this application is capable of giving voice commands to communicate effectively. The Android application is built using Flutter as the front-end and Node js as the back-end, with MySQL as the database. Separate modules are available for administrators, teachers, and parents or students to access the student's information.
