PROJECTS

Hospital Management System

- In most hospitals the existing system has paper records and hence it is difficult to manage. There is no proper provision for patients appointment. In this system user can search availability of doctors and get appointed through online. Time slot management is the important feature in this project.

Ready to Rent

- In this we are introducing an application Ready to Rent which provides renting products like furniture, books, accessories, electronics etc in a single platform. Admin can predict the highly demanded product from the product category.

PRIMARY SKILLS

Python   MySQL   PHP   HTML   CSS
c   Problem solving   Communication
