Time Management

Ability to handle difficult situations

Leadership

Team player

Fast Learner

PROJECTS

✔ **R.Smart mobile service platform**
This project is aimed for making our day to day life easier. This platform is useful for both users and service centers. Here users can place their damaged phones for service from the comfort of their homes or work places.

And also service centers can register and offer their services. The project is python based with django framework.

Github Link:

https://github.com/PranavSudhanan/Online-mobile-service-center.git

✔ **Online Laptop Store**

This project is python based with django as framework. It focuses on building a webstite which is useful for both buyers and sellers. Here sellers can add their products and users can buy from the wide range of products available on the platform.

Github link:

https://github.com/PranavSudhanan/Online-Laptop-Store.git

✔ **Bank Angular Project**

This project uses angular framework for building a bank's webportal. The project uses inbuild angular database

Github link:

https://github.com/PranavSudhanan/Bank-Angular-Project

✔ **Job Portal Website**

A complete full stack website for a job agency with multiple modules for admin, company and user. Provides different UI's based on the type of user you are. The website is developed using python with django for framework.

Github link:

https://github.com/PranavSudhanan/Job-Portal-Website.git

✔ **Image Based Fire Detection**

This python based application is a more modernized approch towards fire detection by using security- driven CCTV video systems as sources of initial fire detection.

✔ **Electricity Billing System**

Electricity Billing System is a software-based application developed in Java programming language. The project aims at serving the department of electricity by computerizing the billing system.
