## PERSONAL PROJECTS

### Text Based Adventure Game (2023)
- It will contain several scenes or "rooms".
- You can create a function for each scene of the Python adventure game so that you can re-use it later if the player ends up entering the same room again.
- Each scene will also have different choices of where to go.

### Contact Book (2023)
- A contact book is used to store some person's contacts like name, phone number etc.
- In this project, we'll build our own contact book using the python programming language.

### Online Shopping Website (2019)
- This project is a web-based shopping system for an existing shop. The project objective is to deliver the online shopping application into android platform.
- This project is an attempt to provide the advantages of online shopping to customers of a real shop.
- It helps buying the products in the shop anywhere through internet by using an android device.
