- Travelling

💼 WORK EXPERIENCE

Headrun Technology, Data support Engineer
May 2023 – October 2023 | Bangalore, India

- Worked on Four Kites projects, including an automatic tracking process using **Python,Django**.
- Designed and implemented a container tracking system that detected when IDs were outside the predefined threshold for a specified number of hours. Crawl runs are stopped during these instances.
- Responsible for monitoring and tracking system thresholds, triggering actions, and sending emails to clients to our Fou kites Team.
- Utilized Freshdesk and Git to manage communication and collaboration with clients and developers, ensuring seamless issue resolution and code management.

🔖 CERTIFICATION

Full Stack Developement
I have completed Python full stack development Jspiders, Rajajainagar at Bangalore

🧩 INTERNSHIP

AWS USING WEB DEVELOPMENT
March 2022

- AWS is a part of the cloud network by using this AWS we can create our own website that users need.
- Access and manage Amazon Web Services through the AWS Management Console, a simple and intuitive user interface. You can also use the AWS Console Mobile Application to quickly view resources on the go.

📁 PROJECTS

School Management System using Python
December 2022

- I have made a website using **Python,Django** that uses CRUD operations to manage the data of the student list.
- On this website, we can add Students and their details and we can create, update, fetch their data and We can also delete the student data.

I have created two login modules in that website.

- One is for the student they can see the attendance tracking.
- Another for staff they can see the student data and edit the student data

Online Railway Reservation System
June 2022

- Developed an Online Railway Reservation system as part of a team project.
- Implemented user authentication and booking functionality using PHP and My SQL.
- Designed a user-friendly web interface with HTML, CSS, and JavaScript.
