Experience

2021-Present
Aventus Informatics | Koratty Infopark
Software Developer
I joined Aventus as a software developer and worked on almost 7 projects there. Was working with Django, RestAPI, HTML, CSS, JS. Used to deal with clients and setting meetings. Recent Project handled by myself on a 4 member team.

2020-2021
Luminar Technolab | Kakkanad
Full Stack Developer Intern
I joined for the internship of full stack developer which consists of Django for backend and AngularJS for the frontend.

2019
Amazon | Coimbatore
Customer Service Associate
Was worked as a customer service associate on chat process of Amazon Coimbatore

Projects

Zajel
Zajel is a food delivery app. I used to do the CRM section of this project and implemented nearby delivery person assigning functionality for the food delivery phase using geographical coordinate distance calculations.

Skill Registry
This app is for finding skilled workers. Workers and user in need have login and workers can bid as per the customer needs. I worked with the CRM portion.

Health-bae
It is an E-Commerce website which consists of their products. Worked on integrations and functionalities from the beginning. On a phase, I used to assign works to the junior developers. health-bae.com is the link to live.

Bizdigitize
It is a B2B app. I worked for the APIs and provided the needed functions for this application.

My Community
My Community is a platform for selling and buying used products. It was based on Qatar and I worked on a small portion on the CRM. mycommunityqatar.com is the link to live server

Tamil

- **Onfully**

  This platform have several features like providing loans..... This is a product collaborated with the kerala government. I worked on a small CRM portion

- **OQSIS**

  This project is based on industry 4.0. Based on 4 dimensions, an organization will be measured from the lower workgroup to the higher hierarchies. I leaded this project with a team of 4 members. This project was for the Hindustan Aeronautics Limited.
