PROJECT

- **Netflix Clone (ReactJS-2022)** – A Netflix replica using React, CSS, and other npm package managers with 2 pages and around 10 different components for reusability. Images, titles, and descriptions of the movie are fetched from TMDB API and React YouTube package for displaying trailers from the API. Updated the code and optimize the performance by 30 percent for better functionality and reduce the line of code by 20 percent.
  Netflix clone 🔗
- **To-Do App (ReactJS-2022)** – A reminder web application to list all tasks to do. React is used to build the web app and CSS for styling. The local storage features of the web browsers are used to save and update the task and can be deleted from the local storage either individually or fully.
  To-do App 🔗
- **Weather App (ReactJS-2022)** - Web application to show the current weather and it auto-switches the background images and weather icon depending upon the climate. Data regarding the weather of various countries' cities are fetched from Open weather API using the Axios npm package. Weather app 🔗
- **Personal portfolio (HTML-2022)** - A portfolio website with parallax effects and hover animations developed with HTML5. CSS3 and Bootstrap are used for styling and responsiveness. Portfolio website 🔗

BCA: -

- **Clean land (2019)** - A website to register complaints regarding waste and to know other information. It consists of admin, employee, and user modules. This project was made by using JavaScript, and MySQL.
- **Blood bank management system (2018)** - Display various work details and other allotments made for the purchase management of the blood banks. This project was made by using Visual Basic and SQL server language.

WORK EXPERIENCE

Marketing Executive & Academic advisor
Career Guidance Centre, Thrissur (2020 – 2021)

- Advertising the course in 4 colleges to improve its popularity and provide consultation to the graduates.
- Convinced more than 15 graduates through consultation, helping them to take admission to a particular course and college.
- Maintained customer relationships by providing the required services.
- Verified the certificates and eligibility for the admission of 50+ candidates and performed several registration activities.
- Supervise and train over 5 newly hired employees, resulting in improved performance, subsequently increasing workplace efficiency.
